

AI Fluency — Portfolio Sitemap & Pressure-Test Audit

Author: Rida Eman (CS Senior & ML Intern) | **Track:** AI Fluency (Draw the Path: Portfolio Sitemap + Toolkit) | **Repo:** github.com/ridaeman02/flyrank-ml-internship

1. Portfolio Sitemap & User Path Sketch

A lean 4-section user path moving visitors from headline claim to technical proof and immediate conversion:

[PAGE 1: HERO / LANDING] → Claim: 'I build models that work on messy real data and I am honest about their limits'
[PAGE 2: WORK / CASE STUDIES] → Proof: 9.8M-row search warehouse model & 0.5000 Precision@50 lift
[PAGE 3: ABOUT & METHODOLOGY] → Identity & Principles: Client-holdout splits & zero data leakage
[PAGE 4: CONTACT & ACTION] → The One Action: Direct interview scheduling & GitHub / Paper links

Page / Section	Core Purpose	Earned Place Rationale	Target Action Supported
1. Hero / Landing	State claim immediately.	Hooks visitors in 5s with quantitative proof.	Drives scroll to Work section.
2. Work / Case Studies	Prove claim with evidence.	Essential proof; shows 9.8M-row pipeline.	Establishes technical authority.
3. About / Method	Establish trust & identity.	Details public safety & split philosophy.	Demonstrates engineering rigor.
4. Contact / Action	Enable conversion.	Removes friction to reach out.	The One Action: Schedule / Hire.

2. Real Claude Session Screenshot & Falsifiable Claim Coaching

Session Title: Draw the Path: Portfolio Sitemap + Toolkit / Focused portfolio positioning for machine learning

Figure 1: Real screenshot of Claude Tutor session refining the falsifiable proof claim.

User Input: "I am passionate about AI and data"
Claude Tutor Feedback: "That's not a claim, that's an interest. 'Passionate about AI and data' could describe thousands of people... Make it falsifiable. Finish this sentence: 'After looking at my portfolio, someone should believe I can specifically ____.'"
Refined Claim: "I build models that work on messy real data and I am honest about their limits, for a lead who needs a useful prototype, not a demo."

3. Sitemap Pressure-Test Output & Refinements

- **Friction Point Identified:** Forcing visitors to navigate to Page 4 to contact adds an unnecessary click.
- **Refinement 1 (Embedded Action Footer):** Embedded contact form and social links into a sticky footer on all pages to enable conversion at any point.
- **Refinement 2 (Methodology Integration):** Integrated client-holdout split principles directly into the Capstone Work section so credentials and proof are viewed together.
